USER MANUAL FL1000

Version: 1.0

Date: Oct. 2018

Important Statement

Firstly thank you for purchasing this terminal, before use, please read this manual carefully to avoid the unnecessary damage! The company reminds you that the proper user will improve the use affect and authentication speed.

No written consent, any unit or individual isn't allowed to excerpt, copy the content of this manual in part or in full, also spread in any form.

The product described in the manual maybe includes the software which copyrights are shared by the licensors. Except for the permission of the relevant holder, any person can't copy, distribute, revise, modify, extract, decompile, disassemble, decrypt, reverse engineering, leasing, transfer, sub-license the software, other acts of copyright infringement, but the limitations applied to the law is excluded.

Due to the constant renewal of products, the company can not undertake the actual product in consistence with the information in the document, also any dispute caused by the difference between the actual technical parameters and the information in this document. Please forgive any change without notice.

Chapter 1: Safety Instruction

1.1 Installation Environment

- ⊳ This lock is used to be placed in the indoor environment, which luminance is in the range of 50-800 Lux.
- \triangleright This lock is used to work under normal light environment. The accuracy and speed of face recognition will decrease if used under strong sunshine light, or strong lamplight.
- Do not expose to sunlight, please draw curtains to block out sunlight. \triangleright
- \triangleright Please make sure that the lighting condition is the same for both registering face template and opening door by face recognition. Otherwise, the recognition performance will be affected.

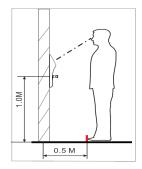

10Lux

higher than 1200 Lux

50-800 Lux

1.2 Position and Gesture

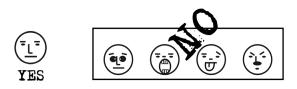

Assuming the average user height is 5-6 feet tall (1.55m-1.85m), then it is about 3.3 feet (1 meter) high from the ground to lock handle. For the average user height is over 5.4 feet (1.65 m), and then the installation height is 3.6 feet (1.1m).

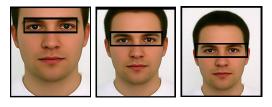

1.3 **Facial Expression**

Eye Position 1.4

During registration, you should move back and forth to adjust the position of your eyes.

1.5 Method for Using the Touch Screen

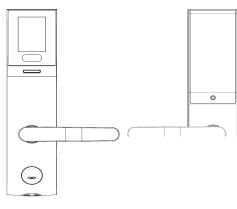

Click the screen with your finger pulp and keep the screen clean during use.

Enroll Card	ł	>

No.	New user No. supports the 1-65535 by default, and the number cannot		
	be modified once enrollment is finished.		
	Normal User Open the lock only by code matching.		
User Role		Unable to register the supervisor.	
The User Role can		Unable to modify the rights of the supervisor.	
be the Normal user	Administrator	Unable to perform data query.	
(default),	Auministrator	Unable to access the Advanced Option.	
Administrator and		Unable to upload the user data and perform firmware	
Supervisor.		update.	
	Supervisor	All operations are available.	

[Notice]

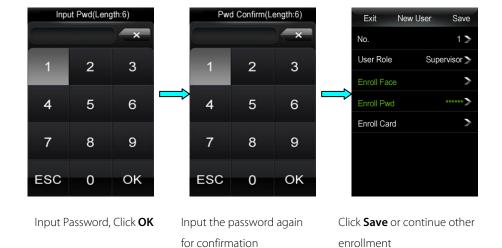

- ☆ The first registered user must be the supervisor, and when the first user is registered as an administrator or a normal user, click Save and the system displays a prompt: For safety, supervisor is first. Will you agree to change? Click OK to set the first user to Supervisor.
- ♦ When registration is completed, the number cannot be changed;

When mode 2 is enabled and only one verification method is registered, if you click Save, the system displays a prompt: Two verifications must be registered. Like Face + Pwd. Refer to the Verify Mode (Main Menu > Setting > Lock Setting) described below for detailed verification modes.

Enroll Face (Main Menu > New User > Enroll Face)

(Notice**)** The enrolled verification mode is displayed in green as shown in the above figure **Enroll Face**.

Enroll Password (Main Menu > New User > Enroll Pwd)

[Notice]

- ☆ The password length must be 6 digits in length. If the password length is shorter than 6 digits, a prompt Length Error is displayed; if the password length is longer than 6 digits, a prompt Input Error is displayed.
- ♦ The passwords of different users cannot be the same, otherwise a prompt **Duplicate PWD** is displayed.
- ✤ If both input passwords are inconsistent with each other, the system displays a prompt Inconsistent Pwd.
- ♦ When the wrong password is input, click **Backspace Button** to delete the password.

> Enroll Card (Main Menu > New User > Enroll Card)

Swipe the ID card over the camera

After a beep sound, when the screen automatically returns to **New User** screen, click **Save**.

[Notice]

- ♦ If the card has been enrolled, the system displays a prompt: Enrolled Card.
- ♦ After enrollment has been completed, click Save to save the enrolled user.

3.3 User Manage

	【Notice】 The Advanced Option is only available to the supervisor.					

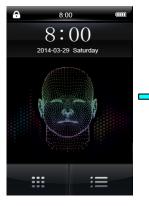

4.9 Restore Default (Main Menu > Setting > Advanced Option)

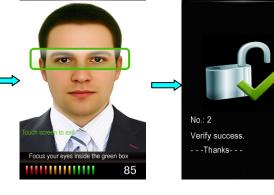

Click **Restore Default** to restore the device parameters to factory configuration. [Note] The option is only available to the supervisor.

Chapter 5: Quick Start

5.1 Open the door with face

Click Power Button

Enter **Face Recognition** Screen automatically

Verification succeeds, and the lock is opened

5.2 Open the door with Password

Click Password Button

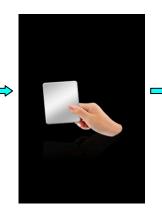

Input Password and click **OK**

Verification succeeds, and the lock is opened

5.3 Open the door with Card

Enable the device, swipe the card over the lower part of the screen of the Main Screen/Face Recognition Screen/Password Input Screen, and the lock is opened after card verification is successful.

Click Power Button

Swipe the card over the camera

Verification succeeds, and the lock is opened

Appendix

10

Environment Protection Explanation

The environmental protection use period marked on our products is the safety period of our products used under the conditions specified by this manual without toxic and harmful substances leaking happened

The environmental protection use period marked on our products does not include the easy wear and tear components required to be replaced regularly such as the battery etc. The battery's environmental protection use period is 5 years.

The toxic and harmful substances or element names and the content table								
Part name	Lead (Pb)	Mercury (Hg)	Cadmium (Cd)	Hexavalent Chromium (Cr6 +)	Polybrominated biphenyls (PBB)	Polybrominated diphenyl ethers (PBDE)		
SMD resistor	×	0	0	0	0	0		
SMD capacitor	×	0	0	0	0	0		
SMD inductance	×	0	0	0	0	0		
SMD diode	×	0	0	0	0	0		
ESD component s	×	0	0	0	0	0		
Buzzer	×	0	0	0	0	0		
Adapter	×	0	0	0	0	0		
Screw	0	0	0	×	0	0		

O: Indicate that the content of the toxic and harmful substance contained in all homogeneous materials of this part is in the limitation requirement stipulated in SJ / T 11363-2006.

x: Indicate the content of the toxic and harmful substance contained in at least one homogeneous material of this part is beyond the limitation requirement stipulated in SJ / T 11363-2006.

Note: The 80% product has adopted the manufacture with non-toxic and harmless environmental protection materials, the non-toxic and harmless substances or elements instead of the toxic and harmful substances or elements contained can not be achieved because of the current technology and economic constraints.
