TS202 Tripod Turnstile

(w/ controller and combination fingerprint & RFID reader)

The ZKTeco TS200 tripod turnstile series is a compact and cost-effective entrance control system designed for high-traffic volume.

TS200 is a single-lane tripod turnstile series designed for smooth and silent operation and draws very little power. It's made of stainless steel which makes TS200 highly durable.

TS200 tripod arms are normally held in a locked position, thus denying access to the secured side. Upon TS200 reader (RFID and/ or fingerprint) positively recognizing a user's valid access card or fingerprint, its tripod arms unlock, thus allowing users passage to the secured side.

During emergencies and power outages the tripod arms completely collapse, thereby ensuring users FAST unencumbered exit to safety.

TS200 provides both security and convenience, all in a very durable compact design.

Features

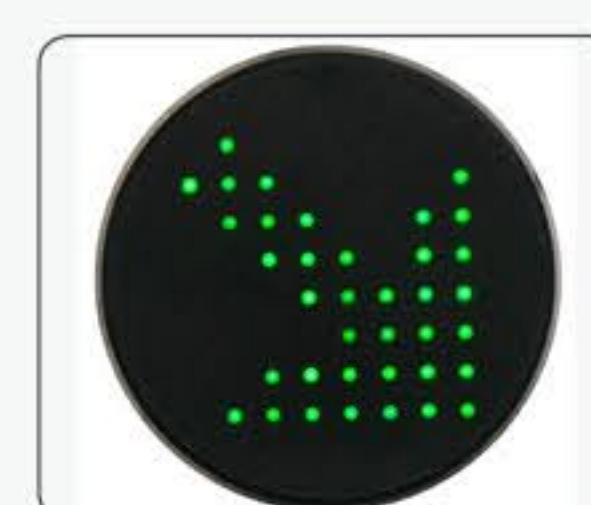

Reliability

- Alloy steel tripod hub and SUS304 stainless steel casework & tripod arms ensure long-lasting durability
- Power conservation. Electro-magnetic locks remain in "standby mode" until turnstile is activated
- Patented oil lubrication system reduces need for maintenance
- High quality electrical components

Safety Features

- Tripod-arms unlock & drop during emergencies /power loss
- Visual indicator for access granted (or denied)
- Ergonomic design makes card and fingerprint authentication fast & simple for users
- Secure. Supports Anti-tailgating

Built-in Reader Integration

- TS200 series ships already integrated with our customers' preference for either card or fingerprint access control reader. This greatly reduces installation time & expense
- TS200 series and associated access control readers are all factory-tested prior to shipping
